

Sizing your Burgee:

For sizing please refer to the following (source: Chapman Piloting & Seamanship):

- Sailboat: Club burgees should be approximately  $\frac{1}{2}$  inch on the fly (horizontal measure) for each foot above the waterline of the tallest mast on the boat (e.g., if the top of the mast is 36 feet above the waterline, the burgee should be 18 inches on the fly, which would equate to a 12" x 18" burgee).
- Powerboats: Club burgees should be  $\frac{5}{8}$  inch on the fly (horizontal measure) for each foot of overall length.
